

AREEBA FATIMA

areeeebafatima@gmail.com, <https://www.linkedin.com/in/areeba-fatima-0310622a8/>

OBJECTIVE

B.Tech Information Technology student with a strong foundation in software development, AI systems, and mobile applications. Passionate about building scalable, real-world solutions and seeking an entry-level role to apply problem-solving skills in backend, AI, or full-stack development.

EDUCATION

B.Tech in Information Technology

Muffakham Jah College of Engineering and Technology (2022 – 2026), Hyderabad

PROJECTS

TruthLens – AI Misinformation Detection Platform

Developed an AI-powered fact verification platform using RAG with multi-format input support (text, URLs, documents, images), implementing evidence-based validation, credibility scoring, and a responsive UI for structured result visualization.

Smart Parking System (IoT + AI)

Built a real-time parking system using ESP32-CAM, OpenCV, and YOLOv8 for slot detection; implemented predictive analytics, automated billing workflows, and live monitoring with mobile app and LCD display.

WellNest – AI Healthcare Web Application

Developed a full-stack healthcare platform with real-time doctor-patient communication, AI-based symptom assistance, appointment booking, health tracking, and secure authentication, with responsive UI and backend API integration.

Federated Learning NLP System

Designed a federated learning-based sentiment analysis system, training NLP models on distributed datasets and deploying a Flask API for real-time predictions.

AI Misinformation Mobile Application

Developed a mobile application for misinformation detection with AI-based backend integration, focused on intuitive UI design and efficient data handling and enabled real-time verification and structured output display

TECHNICAL SKILLS:

Python | Flutter, React Native | FastAPI, Flask | NLP, RAG, Federated Learning | OpenCV | Git, GitHub

INTERNSHIPS

Data Science Intern: Trained and optimized ML models using Hugging Face through iterative experimentation and evaluation.

Talyouth (Novalgnis) Intern: Conducted hygiene and education awareness sessions in underdeveloped schools as part of SDG-based outreach initiatives.
